Innovation Day 2024

Info Point AI assistant inspired by ChatOPM application for Customer Support

DEMO TOUR PROPOSAL FOR YOU:

- Multi-layer engine for faster detection of cyber-attacks
- Let's hack it!
- NEWLIFE (NEtWork & LawfulInterception for FEminicide)
- Identity Fraud Detector

CONVERSATION TRANSCRIPT

User: Hi, can you suggest me some demo regarding the security?

Assistant: We have some exciting demos related to security that you won't want to miss!

- Take a look at the "Multi-layer engine for faster detection of cyber-attacks", an innovative detection method that uses Machine Learning to identify cyber-attacks and network overloads more quickly than traditional methods. You can find it at CRAL and discover how it's revolutionizing the field.

- Get ready to put your security skills to the test with "Let's hack it!", a cybersecurity game that offers a collaborative learning environment. It's also located at CRAL, and it's a great opportunity to learn and have fun at the same time.

- Be sure to check out "NEWLIFE" (NEtWork & LawfulInterception for FEminicide), a demo that uses Lawful Interception techniques to protect stalking victims by monitoring the stalker's distance from the victim. This demo is located at Infermeria and showcases the impact of technology on social issues.

- Last but not least, there's the "Identity Fraud Detector", a network service that monitors communications to identify unethical behaviors such as stalking, cyberbullying, and fraudulent activities. You can find it at

Infermeria and see how it's making a difference.

Would you like to know more about any of these demos or perhaps ask about other security-related topics, such as Quantum-resistant security?

Faithfulness is 1.0 [0.0 - 1.0]

User: many thanks

Assistant: I hope you have a fantastic time at the Innovation Day event at Ericsson in Genoa! Enjoy exploring the various demos and technologies being showcased.
