

Innovation Day 2024 Info Point AI assistant

Inspired by ChatOPM application for Customer Support for Regulatory Solution products

INNO DAY TOUR PROPOSAL FOR YOU:

Demo 7 'Network troubleshooting'

Demo 8 'Enterprise configuration'

Demo 10 'AI robot for demo assistance'

Demo 5 'Network configuration'

Demo 6 'Network optimization'

Demo 9 'Resume Network coverage in critical mission and natural disaster'

CONVERSATION TRANSCRIPT

User: can you tell me something related to connectivity?

Assistant: In the context of Innovation Day 2024, I'm excited to share with you the transformative impact of 5G connectivity, powered by various flavors of artificial intelligence, which enables a wide range of new value-added services.

- The Intelligent Network can self-recover its infrastructure even in the event of a natural disaster, showcasing its remarkable resilience.
- Artificial intelligence simplifies mobile network orchestration and maintenance, making it more efficient and effective.

You might want to ask next: "What demos are related to AI powering Connectivity?"

Faithfulness is 0.0 [0.0 - 1.0]

User: can you tell me the demo related to connectivity?

Assistant: There are several exciting demos related to AI powering Connectivity that you won't want to miss Some of the highlights include:

* "Network configuration" - a game-changing demo that showcases a generative AI assistant that helps build the intents needed to orchestrate the network. This is a fantastic opportunity to see how AI can simplify and streamline network configuration.

* "Network optimization" - a fascinating demo that demonstrates the implementation of a packet-optical dynamic transport network for mobile networks. You'll get to see two specific use cases:

energy consumption savings and RAN sharing by Mobile Network Operators.

* "Network troubleshooting" - an innovative demo that presents a telecom knowledge base utilizing a Retrieval-Augmented Generation (RAG) database to support known issues and solutions for an advanced AI agent system.

* "Enterprise configuration" - a cutting-edge demo that features a crew of collaborative generative AI agents that work together to develop SW applications able to instruct Cobots upon requirements taken from a human operator.

* "Resume Network coverage in critical mission and natural disaster" - a remarkable demo that showcases a remote-controlled rover that dynamically deploys transmitters across an affected area to restore high-capacity communication.

* "AI robot for demo assistance" - an impressive demo that features an innovative, self-balancing robot platform with a 360-degree camera and computer vision, designed for remote operation and real-time data collection.

You might want to ask next: "Can you tell me more about the 'Network configuration' demo?"

Faithfulness is 0.0 [0.0 - 1.0]

User: many thanks!

Assistant: It was my pleasure to help. Have a great day and enjoy the Innovation Day 2024

Faithfulness is 0.0 [0.0 - 1.0]
