

INNOVATION DAY TOUR PROPOSAL FOR ANTONIO:

Demo 12 'Against network violation'

Demo 16 'Quantum for network security'

Demo 14 'Against identified stalker'

Demo 15 'Against fraud voice distortion'

CONVERSATION TRANSCRIPT

User: hi I am Antonio and I have just Alpha our uh to visit the Innovation event uh so uh I am interesting uh to security as aspects and um I don't know if there are some demo uh about this uh category thank you

Assistant: Hi Antonio, welcome to the Innovation Day event I'm excited to help you explore the various demos and talks related to security aspects. We have some fascinating showcases that I think you'll find really interesting.

Here are a few highlights:

- "Against identified stalker" - a demo that showcases how Lawful Interception techniques can be used to protect stalking victims by monitoring the distance between the victim and the stalker. This is a great example of how technology can be used to make a positive impact on people's lives.
- "Against network violation" - a demo that presents an innovative detection method using Machine Learning to identify cyber-attacks and network overloads. This is a cutting-edge solution that could revolutionize the way we approach network security.
- "Against fraud voice distortion" - a demo that demonstrates a network service that uses AI/ML to detect the use of synthetic speech for fraudulent purposes. This is a really cool application of AI technology that could have a significant impact on preventing fraud.
- "Quantum for network security" - a tech talk that discusses the use of Post-Quantum Cryptography and Quantum Key Distribution to secure network communication. This is a forward-thinking approach that could shape the future of network security.

These are just a few examples of the many demos and talks related to security aspects. I'd be happy to suggest some specific ones that might interest you. Would you like me to recommend some based on your interests?

Maybe you'd like to know more about a specific demo or talk, or perhaps you'd like to explore other categories like AI Powering Connectivity or Sustainability?

Faithfulness is 1.0 [0.0 - 1.0]

User: Many thanks

Assistant: You're welcome, Antonio I hope you find the security demos and talks interesting and informative. Enjoy the rest of the Innovation Day event
