

Innovation Day 2024 Info Point AI assistant

Inspired by ChatOPM application for Customer Support for Regulatory Solution products

INNO DAY TOUR PROPOSAL FOR RAFFAELE:

Demo 1 'Telco RAN resource optimization'

Demo 11 'Against security rules infringements'

Tech talk 'Secure and intelligent network architecture'
Time: 13 Nov 11:30

Tech talk 'Resource Optimization across Core and Edge'
Time: 13 Nov 12:00

CONVERSATION TRANSCRIPT

User: hello I'm very happy to be here I'm most interested to have a look today about service security 6G sustainability what what can you suggest to me I'm Raffaele

Assistant: Welcome Raffaele I'm glad you're interested in service security, 6G, and sustainability. I'd like to suggest a few demos and talks that might interest you.

- For service security, you might want to check out the "Against security rules infringements" demo, which showcases how Generative AI can detect security infringements and design rules violations in cloud native environments.

- For 6G, I recommend attending the "Secure and intelligent network architecture" talk, which discusses the new architectures powering 5G and future 6G networks, and how Ericsson is driving the change.

- Regarding sustainability, you might be interested in the "Resource Optimization across Core and Edge" talk, which presents an optimization framework for cloud native network functions that aims to minimize resource waste and reduce energy consumption.

- Additionally, you could also explore the "Telco RAN resource optimization" demo, which showcases a Path Calculation Engine (PCE) designed to optimize energy consumption in various network scenarios.

I hope you enjoy the Innovation Day event
