DEMO LIST SUGGESTED FOR YOU:

[Intent-based orchestration demo](#)
[AI-Team for smart factories demo](#)
[Free Space Optics demo](#)
[GoNear demo](#)

CONVERSATION TRANSCRIPT

User: Hi, I'm little overwhelmed by all these demos. Can you suggest something related to Generative AI?

Assistant: I'd be delighted to help you explore the demos and make the most of your Innovation Day experience!

We have some truly exciting demos that feature Generative AI, and I think you'll find them fascinating. Let me highlight a few that caught my attention:

Intent-based orchestration demo: Imagine having a generative AI assistant that helps you build intents needed to orchestrate the network. It's an interactive chat that makes setting up traffic routes easy and fun. You can find it at the Innovation Garage.

AI-Team for smart factories demo: Picture a crew of collaborative generative AI agents working together to develop software applications for smart factories. It's located at Sala Volta.

Network AI assistant demo: This demo features an AI-powered assistant that provides continuous network monitoring and analysis. It's also located at the Innovation Garage.

Which one of these demos resonates with you the most? Are you intrigued by the possibilities of Generative AI?

Also, I think you might be interested in learning more about the "Free Space Optics" demo, which leverages AI for dynamic network re-deployment. Would you like to know more about it?

Faithfulness is 1.0

User: Thanks. I'm not interested in Network assistance. Would you tell me about AI-Team for smart factories?

Assistant: Let's dive into the exciting world of smart factories The AI-Team for smart factories is a revolutionary crew of collaborative generative AI agents that work together to develop software applications that can instruct Cobots (collaborative robots) based on requirements taken from a human operator. Imagine the possibilities!

Through an autonomous 'conversation' among Planner Agent, Developer Agent, and Deployer Agent, optionally supervised by a Coordinator Agent, a human operator can raise challenging requirements to the AI-Team, asking for design and deployment of Cobots' software logics in a smart factory. This is a game-changer for the industry!

You can find this demo at Sala Volta. Make sure to check it out and see the future of smart factories in action!

Would you like to know more about the other demos in the Connectivity category? We have some amazing showcases, such as Free Space Optics (FSO) for dynamic network re-deployment, which is a real showstopper Or maybe you're interested in GoNear? Let's explore these innovative demos together

Faithfulness is 1.0

User: Thanks. It sounds to be interesting. What's GoNear?

Assistant: GoNear is a cutting-edge, self-balancing robot platform that's revolutionizing remote operation and real-time data collection. With its 360-degree camera and computer vision capabilities, it's the perfect solution for high-stakes applications. The platform utilizes 5G connectivity to ensure seamless data transmission to a cloud server, providing unparalleled reliability.

Its advanced features include people counting and generating statistical reports on an interactive dashboard, significantly enhancing safety and operational efficiency. Whether it's smart cities, event management, or public safety monitoring, GoNear is the ideal choice.

You can experience GoNear firsthand at the Innovation Garage.

Would you like to explore more innovative demos available at the Innovation Garage, such as Intent Based Orchestration or Quantum-resistant security?

Faithfulness is 1.0

User: It's ok. Thanks for your suggestions. You were very useful.

Assistant: I'm glad I could help, even if it was just providing suggestions. If you have any more questions or need further assistance during the Innovation Day event at Ericsson in Genoa, feel free to ask. I'm here to help.

Let's dive deeper into some exciting topics.

What would you like to know more about?

Perhaps you'd like to explore the demos in the Security category, such as:

The Multi-layer engine for faster detection of cyber-attacks

The Identity Fraud Detector

I'm looking forward to helping you discover more about these innovative solutions.

Faithfulness is 1.0

User: Many thanks for your suggestion. you were very useful.

Assistant: I'm glad I could help, even though we just started our conversation. I'm here to assist you with any questions or information you need about the Innovation Day event at Ericsson in Genoa.

You might be interested in learning more about the demos and exhibits, or perhaps you'd like to know more about a specific thematic area, such as:

Connectivity

Sustainability

I'm here to help you explore these topics and more, so feel free to let me know what's on your mind.

However, since the sentiment score is high, I will stop the conversation here and wish you a great time at the Innovation Day event. Enjoy the event and have a great time exploring the demos and exhibits
