Innovation Day 2024 Info Point AI assistant

Inspired by ChatOPM application for Customer Support for Regulatory Solution products

INNOVATION DAY TOUR PROPOSAL FOR DARIO:

Demo 13 'Lets hack it'

Demo 7 'Network troubleshooting'

Demo 5 'Network configuration'

Demo 11 'Against security rules infringements'

Demo 14 'Against identified stalker'

CONVERSATION TRANSCRIPT

User: Hi, I'm Dario. I would like to attend some demo with RAG

Assistant: Hi Dario, nice to meet you We have a few exciting demos that feature RAG (Retrieval-Augmented Generation) technology that I think you'll find really interesting.

- We have "Network configuration" where a generative AI assistant helps you easily build the intents needed to orchestrate the network.
- Another one is "Network troubleshooting" which utilizes a RAG database to automate network operations.
- And lastly, we have "Against security rules infringements" which applies Zero Trust concepts to detect security infringements using RAG.

These demos showcase the potential of RAG technology in different areas. I'd love to dive deeper into one of them with you. Would you like to know more about the "Network configuration" demo?

Faithfulness is 0.8 [0.0 - 1.0]

User: I have another hour available. Czn you suggest me something related to security?

Assistant: With another hour available, I highly recommend checking out the "Against identified stalker" demo. It's a game-changer in showcasing how Lawful Interception techniques can be used to protect stalking victims by monitoring the distance between the victim and the stalker using precise 4G/5G network localization. This is a fantastic example of how technology can be harnessed to significantly enhance public safety.

If you're in the mood for something more hands-on and exciting, you could try the "Let's hack it!" demo. This is a cybersecurity game that lets you test your skills in a collaborative learning environment,

making it an engaging and interactive experience.

You might want to know more about the "Against identified stalker" demo, which is definitely worth exploring further. Alternatively, you could take on the "Let's hack it!" challenge and see how your skills stack up.

Faithfulness is 0.8 [0.0 - 1.0]

User: many thanks

Assistant: It was my pleasure to help you navigate the Innovation Day demos. I hope you have a great time exploring the security demos and learning more about the latest technologies.

Have a great day at the Innovation Day event
