Innovation Day 2024 Info Point AI assistant

Inspired by ChatOPM application for Customer Support for Regulatory Solution products

INNOVATION DAY TOUR PROPOSAL FOR YOU:

Demo 12 'Against network violation'

Demo 10 'AI robot for demo assistance'

Demo 5 'Network configuration'

Demo 2 'Enterprise resource optimization '

Demo 11 'Against security rules infringements'

Demo 14 'Against identified stalker'

CONVERSATION TRANSCRIPT

User: I have two hours. Can yuo suggest me some demo related to secuirity with gen AI

Assistant: With two hours, you can explore some exciting demos related to security with Generative AI. Here are a few suggestions:

- **Against security rules infringements**: This demo showcases how Generative AI can detect security infringements, design rules violations, and Common Vulnerabilities and Exposures (CVE) deviations in cloud native environments. (Duration: 8 minutes)

- **Against network violation**: This demo demonstrates an innovative detection method using Machine Learning to identify cyber-attacks and network overloads. (Duration: 6 minutes)

- **Against identified stalker**: This demo employs Lawful Interception techniques to protect stalking victims by ensuring accurate verification of safe distances between the victim and the stalker. (Duration: 10 minutes)

These demos are all related to security and feature Generative AI. You can choose one or two that interest you the most, and still have some time to explore other demos or ask questions.

What would you like to ask next? Would you like to know more about a specific demo or explore other thematic areas, such as Sustainability or AI Powering Connectivity?

Faithfulness is 1.0 [0.0 - 1.0]

ERICSSON

User: Can yuo suggest me other demo filling the two hours?

Assistant: With two hours, you can explore a mix of demos from different thematic areas that will surely spark your interest and passion for innovation. Here's a suggestion to make the most out of your time:

- **Against security rules infringements** (8 minutes) - This demo is a game-changer, showcasing how Generative AI can detect security infringements in cloud native environments, giving you a glimpse into the future of cybersecurity.

- **Network configuration** (10 minutes) - Imagine having a Generative AI assistant that helps you easily build intents needed to orchestrate a network, making the configuration experience more interactive and user-friendly - this demo will show you how.

- **Enterprise Resource optimization** (10 minutes) - Get ready to be impressed by a centralized licensing system that leverages AI/ML to optimize industrial resource management, enabling data-driven decisions for energy saving and predictive maintenance.

- **AI robot for demo assistance** (8 minutes) - This demo features an innovative, self-balancing robot platform with a 360-degree camera and computer vision, designed for remote operation and real-time data collection - a true marvel of AI-powered robotics.

These demos cover a range of exciting topics, including security, network configuration, resource optimization, and AI-powered robotics. You'll get a comprehensive overview of the various applications of AI and Generative AI in different domains, and we're sure you'll be eager to learn more.

What would you like to ask next? Would you like to know more about a specific demo or explore other thematic areas, such as Sustainability or Advanced Technology?

ERICSSON

Faithfulness is 1.0 [0.0 - 1.0]

Assistant: It was my pleasure to help you plan your Innovation Day experience. I hope you have a great time exploring the demos and learning about the latest advancements in AI and technology. Enjoy the event

Faithfulness is 1.0 [0.0 - 1.0]

User: many thanks
