Innovation Day 2024 Info Point AI assistant

Inspired by ChatOPM application for Customer Support for Regulatory Solution products

INNOVATION DAY TOUR PROPOSAL FOR YOU:

Demo 13 'Lets hack it'

Demo 12 'Against network violation'

Demo 10 'AI robot for demo assistance'

Demo 5 'Network configuration'

Demo 11 'Against security rules infringements'

Demo 14 'Against identified stalker'

CONVERSATION TRANSCRIPT

User: I have two hours. Can yuo suggest me some demo related to secuirity with gen AI

Assistant: With two hours, you can definitely explore some exciting demos related to security with Generative AI. Here are a few suggestions:

- **Against security rules infringements**: This demo showcases how Generative AI can detect security infringements, design rules violations, and Common Vulnerabilities and Exposures (CVE) deviations in cloud native environments. (Duration: 8 minutes)

- **Against network violation**: This demo demonstrates an innovative detection method using Machine Learning to identify cyber-attacks and network overloads. You'll see how Generative AI can correlate predictions on single parameters to detect security threats. (Duration: 6 minutes)

- **Against identified stalker**: This demo employs Lawful Interception techniques to protect stalking victims by monitoring the distance between the victim and the stalker using 4G/5G network localization. (Duration: 10 minutes)

These demos are all related to security and feature Generative AI. You can choose one or two that interest you the most, and still have some time to explore other demos or ask questions.

What would you like to ask next? Would you like to know more about a specific demo or explore other thematic areas like Sustainability or AI Powering Connectivity?

ERICSSON

User: Can yuo suggest me other demo filling the two hours?

Assistant: With two hours, you can explore a mix of demos from different thematic areas that will surely spark your interest and passion for innovation. Here's a suggested plan to make the most out of your time:

First hour:

- **Against security rules infringements** (8 minutes): Get ready to discover how Generative AI can detect security infringements, design rules violations, and Common Vulnerabilities and Exposures (CVE) deviations in cloud native environments. This demo is a game-changer for cybersecurity enthusiasts.

- **Network configuration** (10 minutes): Imagine having a generative AI assistant that helps you easily build the intents needed to orchestrate the network. You'll be amazed at how AI can transform the configuration experience for setting the traffic route into an interactive chat.

Second hour:

- **Let's hack it** (10 minutes): Dive into an immersive experience that enables you to explore the world of cyber threats. You'll learn about the importance of hacking in identifying vulnerabilities and strengthening cybersecurity protocols. This demo is a thrilling way to understand the impact of hacking on cybersecurity.

- **AI robot for demo assistance** (8 minutes): Be amazed by an innovative robot platform with a 360-degree camera and computer vision, designed for remote operation and real-time data collection. You'll see how AI can enhance safety and operational efficiency in a truly innovative way.

These demos offer a fantastic mix of security, AI, and innovation that will surely leave you wanting

more. You'll get to see how Generative AI can be applied to various areas, from security to network configuration and even robotics.

What would you like to ask next? Would you like to know more about a specific demo or explore other thematic areas like Sustainability or Advanced Technology?

Faithfulness is 0.0 [0.0 - 1.0]

User: many thanks

Assistant: It was my pleasure to help you plan your Innovation Day experience. I hope you have a great time exploring the demos and learning about the latest innovations in security, AI, and more. Enjoy the event
